Subject: Deficient Notice of Intention to Commence Small Mining Operations,
Perihelion Global, Inc., Saturday Night #1 & #2 Mine, S/003/076, Task ID#
1696, Box Elder County, Utah

Dear Mr. Beebe:

The Notice of Intent to Commence Small Mining Operations (NOI), received by the Division February 13, 2007 (updated maps received March 6, 2007, is incomplete. The following information is required:

1. Page 3 of the NOI indicates that the surface and mineral owners have **not** been notified, yet you claim you have legal right to enter and conduct mining operations. While the BLM is now aware of this project you must obtain a surface right of way before the access road can be constructed and/or improved. If you have not already done so, please contact Michael Nelson with the BLM (Salt Lake Field Office) at (801) 977-4300 to apply for this right of way.
2. In checking with the Utah Division of Corporations (DOC), Perihelion Global, Inc. is a 'name reservation', and does not meet the requirement that you be registered to do business in the State of Utah. Until you are registered with DOC to do business in the State of Utah, the Division cannot approve your notice.
3. Please confirm correct mailing and corporate addresses. Page one of the NOI indicates the address as PO Box 488, Mary Esther, FL 32569. Yet on page 3 the address is listed as 166 Acacia, Santa Rosa Beach, FL 32459. If one address is a mailing address vs. corporate headquarters address, just clarify.
4. The NOI indicates that drilling will take place, yet there is no discussion on the number of drill holes, the anticipated depth of drilling, location of drill holes, or whether it is anticipated that water will or will not be encountered. Please provide a discussion on the drilling program, including the number of

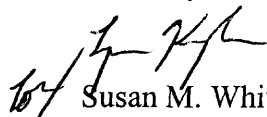

holes to be drilled, the location of the drill holes, anticipated depth of drilling for each hole and whether it is anticipated that water will be encountered in each hole (basis for determining whether water will be encountered or not needs to be provided).

5. The NOI does not indicate any new roads (yet the map provided on March 6, 2007 indicates there is a portion of new road that will be constructed). The NOI indicates existing roads will be improved, but does not provide the length or width of improvement. Please provide the length and width of all new roads to be constructed as well as the length and width of improvements made to existing roads.
6. The general location map does not have a title block, legend, map scale, north arrow or date. Please provide a new map with this information included. Previous disturbances for which Perihelion is not responsible should also be shown on this map. The Division also suggests previous disturbances be photo- documented as well.
7. The operations map identifies the mine as the PHGI P-2 mine, yet the NOI states that the name for this operation is the Saturday Night #1 & #2 Mine. Please correct the mine name information.

Reclamation surety is required to be posted by all mining and exploration operations prior to conducting operations. Until the information requested above is provided, the Division cannot calculate the amount of reclamation surety required.

If you have any questions, please contact Lynn Kunzler at (801) 538-5310. In reply, please refer to file number S/003/076. Thank you for your cooperation.

Sincerely,

Susan M. White
Mining Program Coordinator
Minerals Regulatory Program
